### OPERATIVE REPORT

**PATIENT NAME:** Plock, Robert  
**PATIENT HOSPITAL NUMBER:** 308392  
**PHYSICIAN:** Andrew Park, M.D.  
**DATE:** 09/26/13

**PREOPERATIVE DIAGNOSIS:** Spondylolisthesis, L5-S1, with bilateral L5 pars fracture and instability at L5-S1.

**POSTOPERATIVE DIAGNOSIS:** Spondylolisthesis, L5-S1, with bilateral L5 pars fracture and instability at L5-S1.

**PROCEDURE PERFORMED:**

1. Anterior lumbar radical discectomy, L5-S1.
2. Anterior lumbar fusion, L5-S1.
3. Partial corpectomy of the L5 vertebral body in order to decompress the spinal canal and exiting bilateral L5 nerve roots.
4. Anterior lumbar intervertebral body cage preparation and insertion.
5. Anterior lumbar instrumentation with fixation screws through the cage into the sacrum.
6. Use of BMP and graft for spinal fusion, L5-S1.
7. Posterior fusion, L5-S1.
8. Posterior lumbar instrumentation, L5 and S1.
9. Use of MagniFuse and local bone for spinal fusion, L5-S1 posteriorly.
10. Open treatment of lumbar fracture and instability.

**CO-SURGEON:** Randall P. Kirby, M.D. (Dr. Kirby is the co-surgeon of record for the anterior lumbar fusion, L5 and S1.)

**FIRST ASSISTANT:** Koijan Singh Kainth, M.D. (Dr. Kainth is the first assistant of record for the posterior spinal fusion, the posterior instrumentation, the partial corpectomy of the L5 vertebral body, the intervertebral body cage preparation and insertion, and the open treatment of a lumbar fracture.)

**ANESTHESIA:** General endotracheal anesthesia.
